B. SCOTT MCCORD

Mr. McCord, a senior associate at Booz, Allen & Hamilton Inc., received a B.S. degree in Mathematics and Applied Science from the Naval Academy and an M.S. degree in Computer Science from the U.S. Naval Postgraduate School.

Mr. McCord has 10 years of professional experience in computer and communications systems including local and wide area network analysis, software engineering and data base design, Department of Defense (DOD) and commercial data communications, computer system analysis and acquisition, information system design, software and hardware economic analysis, software quality assurance, system life-cycle management, software development, quality assurance, and independent verification and validation (IV&V). Mr. McCord also has experience in more than 10 programming languages and data base management systems on mainframes, minicomputers, and microcomputers. Mr. McCord is familiar with the implementation of information systems in Air Force and other DOD environments and the development of local area network (LAN) and information standards.

At Booz, Allen, Mr. McCord is leading an 11-year, \$30 million contract to implement an IBM 9370-harcel information system for the Marine Corps using Oracle and VM center in worldwide SNA networks. The system will provide improved management capabilities for Marine Corps real property assets at 16 major sites worldwide.

For the Worldwide Military Command and Control System Information System Joint Program Office, Mr. McCord led the design of a system to translate documents between incompatible word processors. The system was designed to translate documents between native formats through an interim format based on the Navy's document interchange format, implemented on a VAX 11/780 in Ada, and used through the Defense Data Network.

Previously, Mr. McCord led an analysis of the use of two electronic mail systems and their effects on productivity in Defense Communications Agency (DCA): a metropolitan-based system implemented on Wang VS systems using Mailway and a worldwide system implemented on a BBN C/70 and attached to the Defense Data Network. The methodology was based on National Bureau of Standards Special Publication 500-72 and was transferred to and documented in a DCA pamphlet distributed to justify office automation needs.

For a European shipping company, Mr. McCord directed the preparation of a business system information plan, identification of missing strategic systems, recommendations for migration of an ADP equipment base, and development of a 5-year

management information system plan.

For a regulated subsidiary of an independent telephone company, Mr. McCord supervised the development of standard procurement policies and procedures for the acquisition of commercial software products and development services to build internal systems. The assignment focused on project management standards for large software development efforts.

Mr. McCord also led a requirements analysis of a computer research system for a large Wall Street firm to support the trading of fixed-income securities. The analysis included functional and performance requirements identification, communication requirements, architecture formulation, vendor evaluation, and short- and long-term planning.

Before joining Booz, Allen, Mr. McCord was a principal engineer at an engineering consulting firm where he provided program support and software quality assurance for the Air Force prototype jet engine diagnostic system of the Air Force Logistics Command. The prototype was implemented in FORTRAN on a PDP 11/70, with graphic displays to portray engine health and communicated with a remote AMDAHL 470/V7. Program support included preparing input for program objective memoranda and life-cycle management in accordance with DOD STD 7935.1 and Air Force regulations (AFRs) 300-12 and 300-15.

For the Air Logistics Center at San Antonio, Texas, Mr. McCord performed an economic analysis of computer and communication system alternatives to support the Air-Force-wide Nondestructive Inspection Program. This analysis was conducted in accordance with AFR 178-1 and AFP 178-8.

Mr. McCord supervised the technical aspects of many DOD projects including:

- IV&V of the Electronic Warfare Automated Integration System Facility at the Warner Robins Air Logistics Center
- Requirements analysis of the Air Force Logistic Command's stock control and distribution system
- Interface control documents for the Air Force's comprehensive engine management system
- Analysis tools and risk analysis for acquisition programs at the Army's Troop Support and Readiness Command.

For Air Force Headquarters, Mr. McCord managed a project to improve the computer and communications support provided to

headquarters staff. The project involved installing a broadband LAN, identifying communication and information processing standards and security features, and designing the general technical framework through which the LAN and attached devices were to be used. The automated data processing environment included mainframe and minicomputer systems such as IBM 3032s, VAX 11/780s, and Honeywell DPS 8-70s; workstations; and gateway requirements to wide area networks such as MILNET and AUTODIN. Mr. McCord also contributed to the related development of the Unified LAN Architecture (ULANA). Booz, Allen developed standard LAN components specifications for ULANA to use throughout the Air Force.

Previously, Mr. McCord served in the Marine Corps in the infantry, reconnaissance, and data systems. Mr. McCord was also a primary system analyst at Headquarters, Marine Corps, where he evolved systems for the logistic community. He analyzed data communication requirements for developing logistic systems, managed system life cycles, designed data bases, and specified computer and communications hardware and software for acquisition.

Mr. McCord is a member of the Association for Computing Machinery (ACM), several ACM special interest groups, the Institute of Electrical and Electronics Engineers, and the Armed Forces Communications and Electronics Association. He holds a Top Secret security clearance.

Esther Thomas Smith
1953 Gallows Road, # 130
Vienna, Virginia 22180
(703) 848-2800

President, TechNews, Inc., Founder and Publisher, *Washington Technology*.

In 1985 Mrs. Smith organized the company that publishes a local technology business newspaper for the Metropolitan Washington-Baltimore technology community. From an initial circulation of 10,000 In April, 1986, the bi-weekly newspaper now has a circulation of more than 32,000 among managers and professionals in more than 7,000 area technology companies and in technology-oriented university and federal government programs. The estimated readership per issue is more than 105,000.

Business writer and communications consultant, 1982-1985.

During this period when Mrs. Smith accompanied her husband on an assignment away from the area she wrote articles on business trends and personal finance for a number of local and national periodicals.

**Founding Editor, *Washington Business Journal* (1982)
and *Business Review of Washington* (1978).**

Mrs. Smith was founding editor and general manager of the area's first independent business newspaper, and later served the same role in the founding of a Scripps-Howard business journal, since acquired by American City Inc.

Communications consultant, 1981.

Mrs. Smith advised the regional office of a Big 8 accounting firm, an international public relations firm and a national law firm on marketing professional services in the region.

Affiliations:

Mrs. Smith is a charter member of the Women's Forum of Washington; a former member of the board of the National Association of Military Families; a founding member of the board of the M.I.T. Enterprise Forum; and a member of the advisory board of Northern Virginia Community College. She is founder of the Washington Technology Council and a co-founder of the Washington Technology Foundation. She has been listed in Who's Who of American Women since 1982.

Education:

Mrs. Smith obtained a bachelor's degree in English and Philosophy from Agnes Scott College.

HARRY W. SCHLOUGH
ARTHUR ANDERSEN & COMPANY
MANAGEMENT INFORMATION CONSULTING DIVISION

Background

Mr. Schlough is an Experienced Manager in the Management Information Consulting Division of Arthur Andersen & Co.'s Chicago office. He has a broad background in the development of large integrated online systems for both public and private sector clients. Mr. Schlough is experienced in all aspects of the software engineering lifecycle, from planning and design through implementation, training and production systems support. He is the Technology Coordinator for the Management Information Consulting Division in the area of Document Storage and Retrieval Systems.

Mr. Schlough holds a Bachelor of Arts Degree in Economics from Northwestern University, Evanston, Illinois.

BIOGRAPHY

Frank McDonough has been the Deputy Commissioner of the Information Resources Management Service in GSA for eight years.

In this job, he gets involved in most of the big ADP, Telecommunications, and Records Management issues in the Government.

Frank has been in information management jobs for twenty five years with experience in Navy, HHS, Treasury, and IBM before GSA.

Frank has tended to concentrate on emerging governmentwide issues; and, he tries to anticipate these early when there is still time to negotiate among all the different interest groups in agencies, Congress, and in the vendor community. He has for example, been an influence in the following subjects:

1. Development of a modernization program for Federal computer technology.
2. Assigning more GSA authority and responsibility to Agency IRM Officials.
3. Establishment of the Go-for-12 program to speed up major acquisitions.
4. Establishment of the Trail Boss program to help the managers of major acquisitions.
5. Development of guidelines to ensure that handicapped employees are not left behind as electronic technology is introduced throughout the government.

Most of what Frank works on has an effect on each of us and our organizations.

MS. BRENDA J. MISMAS

SOFTWARE PROJECT MANAGER

Federal Software Management Support Center

Office of Software Development and Information Technology
U.S. General Services Administration

Ms. Mismas is a Project Manager for the Federal Software Management Support Center, a fully reimbursable subsidiary operation of the General Services Administration's Office of Software Development and Information Technology. She has held that position since 1982.

The Software Center specializes in the development, implementation and management of software programs, primarily software conversion and renewal, on a Governmentwide basis. It's client list includes virtually every major agency of the Federal Government and accounts for the management of projects valued, in the aggregate, at over \$100 million annually.

Ms. Mismas has fifteen years experience working in various areas of the data processing field within the Federal Government. Her specific background includes:

- o 9 years with various Department of Defense agencies, specializing in software maintenance, development, improvement, and conversion projects; and
- o 6 years with the Software Center, in the general areas of software contracting and contract management for major software projects.

In addition to supporting specific client agency software projects, Ms. Mismas counts her support in the areas of development of the Software Center's Multiple Award contract, the development of a report on Fourth Generation Languages, and assistance with the establishment of a contract for commercial Financial Management Software as her most important contributions toward advancing the state of software management throughout the Federal Government.

Ms. Mismas has undergraduate degrees in Zoology and Psychology, and has completed numerous graduate courses in Information Systems. She resides in Arlington, VA.

VITA

JOHN J. LANE

John J. Lane is Vice President and Deputy of the Network Systems Division of Computer Sciences Corporation. In that capacity he reports directly to the Division President, providing general oversight of all Division operations and support areas, as well as exercising line management over all new business development, planning and IR&D activities. He previously served at CSC as Vice President for Planning of the Systems Group of CSC, the nation's largest independent information sciences company. His responsibilities included development of tactical business plans, five year strategic plans and coordination of the research and development program.

He came to CSC from the Department of Justice, where he served both as Deputy Assistant Attorney General, heading the Office of Information Technology, and as Special Advisor for Technology to the Deputy Attorney General. At the Department of Justice, Mr. Lane had both staff and operational responsibilities, exercising departmental level oversight of division, office and bureau programs, providing technical guidance, and operating the Department's common user telecommunications, centralized computer centers and law libraries.

Mr. Lane served in the Department of Defense for 25 years, in both military and civilian capacities, retiring from the Air Force in the grade of Colonel. As Director of Information Systems for the Assistant Secretary of Defense for Command, Control, Communications and Intelligence (ASD C3I) for five years, he exercised policy and program oversight of strategic information systems, data communications networks, Service and Defense Agency communications programs, the information security program and major portions of the Defense Communications System.

Mr. Lane's many professional recognitions include an Air Force Project Manager of the Year Award, the Air Force Communications-Electronics Professionalism Award and the AFCEA Honor Award for C3I Research for his book analyzing the evolution of C3 systems during the Vietnam conflict.

His graduate work includes degrees in Law, Business Administration, and Computer Science. He is a member of the bar in Virginia and the District of Columbia. He is also a member of the Armed Forces Communications and Electronics Association (AFCEA), the Air Force Association, the American Institute of Aeronautics and Astronautics (AIAA), the D. C. Chapter Law Forum, the Computer Law Association, Phi Kappa Phi, the Science and Technology Section of the American Bar Association and the Association for Federal Information Resource Management.

Mr. Lane and his wife, Marie, reside in Great Falls, Virginia.

the 1990s, the number of people with a mental health problem has increased in the UK, and the number of people with a mental health problem who are in contact with mental health services has also increased (Mental Health Act 1983, 1993).

There is a growing awareness of the need to improve the quality of care for people with a mental health problem (Mental Health Act 1983, 1993). The Mental Health Act 1983, 1993, and the Mental Health Act 2003, 2003, have been introduced to improve the quality of care for people with a mental health problem. The Mental Health Act 2003, 2003, has been introduced to improve the quality of care for people with a mental health problem.

INPUT, Inc.

8298 C, Old Courthouse Road, Vienna, VA 22180

(703) 847-6870

April 28, 1988

Mr. Timothy F. Shaw
Vice President
VIAR AND COMPANY
300 N. Lee Street
Alexandria, VA 22314

Dear Timothy:

Plans for INPUT's fifth annual Federal Information Systems and Services conference are finalized. The dates for this one and one-half day event are **June 9 and 10, 1988.**

This year's conference theme is **"Providing Solutions to Federal Information Processing Problems."** The one and one-half days will focus on the industry's ability to provide solutions to federal information processing. With reduced staff, greater productivity demands and more-complex and visible tasks the government is looking to the information services industry for solutions. The conference will address these challenges and the industry efforts to answer them with systems integration, professional services, software technology and telecommunications. A conference agenda is enclosed for your perusal.

The location for the conference is the **Tyson's Corner Marriott in McLean, Virginia.** A block of rooms have been reserved for conference attendees. Please make your room reservations directly with the hotel by calling (703) 734-3200 and mentioning the INPUT conference.

The conference will start at 9:00 on Thursday morning with registration and continental breakfast beginning at 8:30 a.m. The first three representatives from your organization can attend the conference at no charge. Additional attendees are encouraged to attend at a nominal fee of \$150 per attendee. Please return the enclosed registration form to Jan McDaniel by May 26, 1988.

If you have any questions about the conference, contact Jan at INPUT's headquarters office (415) 961-3300 or Jim Kerrigan at (703) 847-6870. We are looking forward to presenting this information to you in June.

Sincerely,

John E. Frank
Vice President
